# IFLEX BOX

Optimization of electric mobility

ELECTRICFIL AUTOMOTIVE 77, Allée des grandes Combes ZI OUEST BEYNOST F - 01708 MIRIBEL CEDEX FRANCE T. +33 0(4) 72 01 34 34 WWW.EFIAUTOMOTIVE.COM

# **Application description**

The IFlexBox is a sub-unit inside / outside the battery pack in high voltage electrical or hybrid systems. It can be installed in the battery housing either in the "chocolate bar" in the cell pack or on top of the battery housing (so called "penthouse" location).

This sub-unit is responsible for monitoring, activating, and deactivating the high voltage battery system. It (dis-)connects the battery to the vehicle high voltage powertrain and charging systems. It also performs overcurrent / short circuits detection enabling related safety interruptions.

### **Key Facts**

- Space saving
- Easy installation and integration
- Good heat dissipation
- Good electrical insulation

### Benefits

- Localized HV interfaces or Plug-type HV-connectors
- Small volume design: Weight : 5 kg Volume : 6 litres
- Different contactor and switch off components: Main contactors / Contactors for DC charging Pre-charge circuit HV fuse
  Pyro Fuse or Pyro Switch
- Customization to various battery designs
- Voltage, current and temperature measurements

# IFLEXBOX

#### Technical information / Performance parameters

### Options

- 1000 V battery designs
- Max unlimited current : 500A
- DC Fast Charging Power : up to 350 kW
- Redundant Current Sensor

## Power Schematics & BOM

ELECTRICFIL AUTOMOTIVE 77, Allée des grandes Combes ZI OUEST BEYNOST F - 01708 MIRIBEL CEDEX FRANCE T. +33 0(4) 72 01 34 34 WWW.EFIAUTOMOTIVE.COM

- Integration of electronics
- Contactor drive signal optimization
- Additional auxiliary secondary protection
- Die cast housing for top mounting onto the battery housing

# **Electronic Control Options**

- Local control of main and DC charge contactors (digital or PWM)
- High-voltage Voltage, current, temperature measurements
- High-voltage Voltage, current, temperature isolation interface
- Overvoltage / Overcurrent / Overtemperature diagnostics
- Active pre-charge
- HS CAN bus interface to BMS
- Local interface with 12V LV filtered power-supply
- Isolation monitoring
- Interlock monitoring
- Crash signal monitoring for Pyro component drive
- Local interfaces and components to improve redundancy and safety coverage
